

Absolutely The Best Crane Mats In The World.

This document is stored and available in the Raptor Tech Technical Document Repository.

To help our customers understand certain critical data points that factor into purchasing crane mats, Raptor Tech maintains a repository of technical documents with data from all major crane manufacturers.

You can visit Raptor Tech's repository to get crane specifications and technical details for crane models in addition to this model at:

<https://library.steelcranemats.com>

Thank You for Visiting the SteelCraneMats.com Technical Specifications Document Repository.

Compact mobile crane/Grue mobile compacte **LTC 1050-3.1**

Option

Variable steering concept
Concept de direction variable

Excellent driving characteristics
Caractéristiques de conduite excellentes

Movable crane cabin
Cabine du grutier télescopable

Taxi crane – Complete equipment can be carried on the crane with 26,455 lbs axle load

Grue d'intervention rapide – L'équipement intégral est transporté sur la grue, en respectant la charge par essieu de 26,455 lbs

Compact design - ideal lifting device in confined spaces, e.g. for crane work in industrial buildings.

Construction compacte – appareil de levage idéal pour des espaces restreints, par ex. pour le travail de grue dans les halls industriels.

Efficient chassis and drive technology

Un porteur maniable et efficace

High mobility and great economy

The powerful diesel engine enables it to be driven at high speeds. The automatic power-shift transmission delivers excellent manoeuvrability and comfort. A torque converter allows for sensitive manoeuvring and minimal crawling speeds.

Mobilité et rentabilité à toute épreuve

Grâce à son puissant moteur diesel se distingue par ses excellentes performances routières. La boîte de vitesse automatique permet une manœuvrabilité exceptionnelle et un confort optimum. Un convertisseur de couple assure une vitesse de rampage minimale et des manœuvres de précision.

Comfort and functionality

Confort et fonctionnalité

Smart cabin concept for ergonomics and safe working

The crane cabin is moved to the front of the vehicle on a telescopic arm for driving on the road and secured mechanically. In this position, the crane handles well even at high speed. The adjustable cabin enables Liebherr to offer perfect visibility.

Concept de cabine intelligent et ergonomique pour des travaux en toute sécurité

Pour les déplacements sur routes, la cabine du grutier est décalée par un bras télescopique vers l'avant du véhicule et bloquée dans cette position. Cette position de la cabine permet au grutier de profiter d'un bon confort de conduite. Grâce à cette cabine coulissante Liebherr, bénéficie d'une visibilité optimale.

Comfort and functionality

Confort et fonctionnalité

Modern driver's and crane cabin

- All-round safety glass, tinted windows, large lines of vision with excellent all-round visibility
- Opening front and roof windows
- Independent additional heating system
- Air-conditioning system
- Pneumatic driver's seat with lumbar support, multiply adjustable
- Heated, electrically adjustable exterior mirrors

Cabine de conduite et du grutier moderne

- Vitrage panoramique, vitres teintées, champ de vision optimal grâce à un large vitrage
- Pare-brise avant et lucarne de toit ouvrant
- Chauffage d'appoint indépendant du moteur
- Climatisation
- Siège conducteur à suspension pneumatique avec appuis lombaires, réglable en plusieurs positions
- Rétroviseurs dégivrant et réglables électriquement

Cabine du grutier télescopable

La cabine du grutier télescopable, disponible en option, offre une visibilité optimale pendant les travaux avec la grue. La hauteur du champ de vision du grutier peut atteindre 25'7". La cabine relevable contribue considérablement à la sécurité sur le chantier.

Telescoping crane cabin

The optional telescoping crane cabin delivers excellent visibility during crane operations. It takes the crane driver to an eye level of up to 25'7". The lift cabin makes a valuable contribution to high safety levels.

Le calage de la grue – rapide, confortable et sécurisé

Les poutres de calage sortent hydrauliquement. La commande se fait via le terminal BTT Bluetooth ou depuis la cabine du grutier. Quatre projecteurs intégrés éclairent parfaitement la zone de calage.

Supporting the crane – fast, convenient and safe

The supports are extended fully hydraulically. They are controlled using the BTT Bluetooth Terminal or from the crane cabin. Four integral lights provide excellent lighting of the support area.

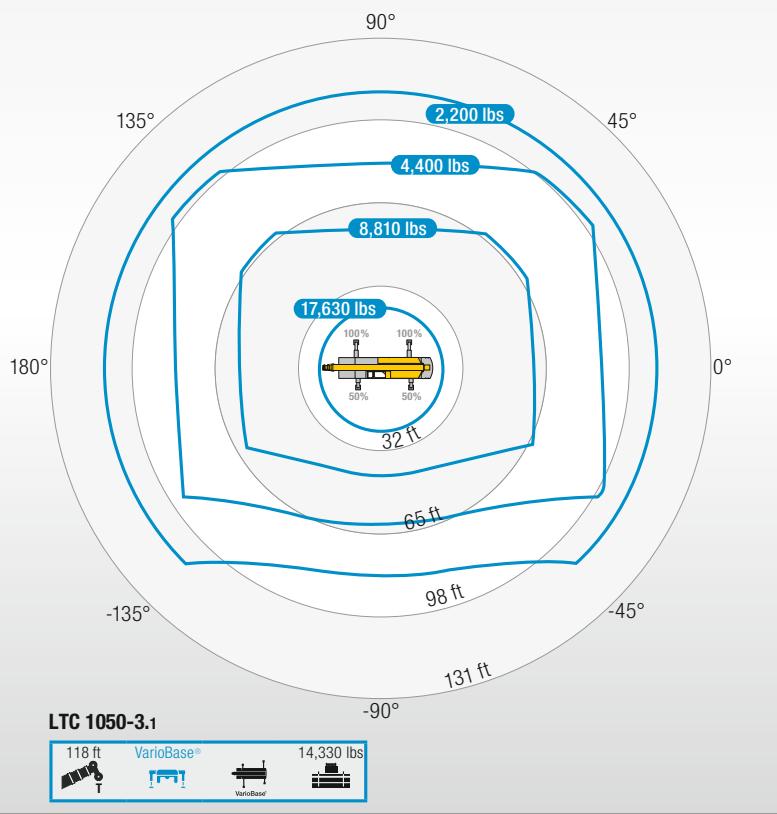

Variable supporting base for greater safety and higher lifting capacity

VarioBase® allows each individual crane support to be extended to variable lengths. At the same time, the crane's work is secured by the LICCON controlled load moment limiter. The extension length and support force of each outrigger is measured and the maximum load capacities for exactly this situation are calculated by the crane controller.

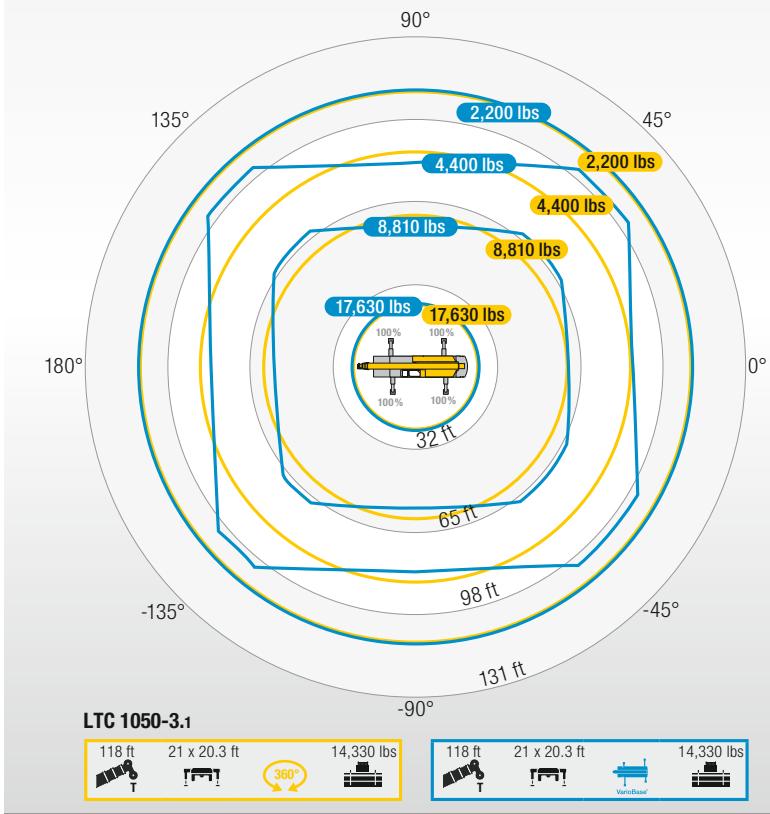

Une base de calage variable pour plus de sécurité et de capacité

Grâce à VarioBase®, chaque poutre de calage de la grue peut être déployée individuellement. L'utilisation de la grue est simultanément sécurisée par le contrôleur d'état de charge de la commande LICCON. La longueur de sortie et la force de calage de chaque stabilisateur sont mesurées et les capacités de charge précisément autorisées dans cette situation sont calculées dans la commande du contrôleur de charge.

Greater safety in constricted working conditions
Plus de sécurité dans les zones de travail étroites

Higher lifting capacity and larger working range
Une capacité plus importante et une zone de travail plus large

Greater safety

The maximum lifting capacities are calculated individually and precisely for every situation. This ensures safe working practice with any chosen support base.

Sécurité accrue

Les charges autorisées sont calculées individuellement et en fonction de la situation actuelle. Les opérations sont ainsi sécurisées avec chaque base de calage au choix.

Optimized dimensions

Dimensions optimisées

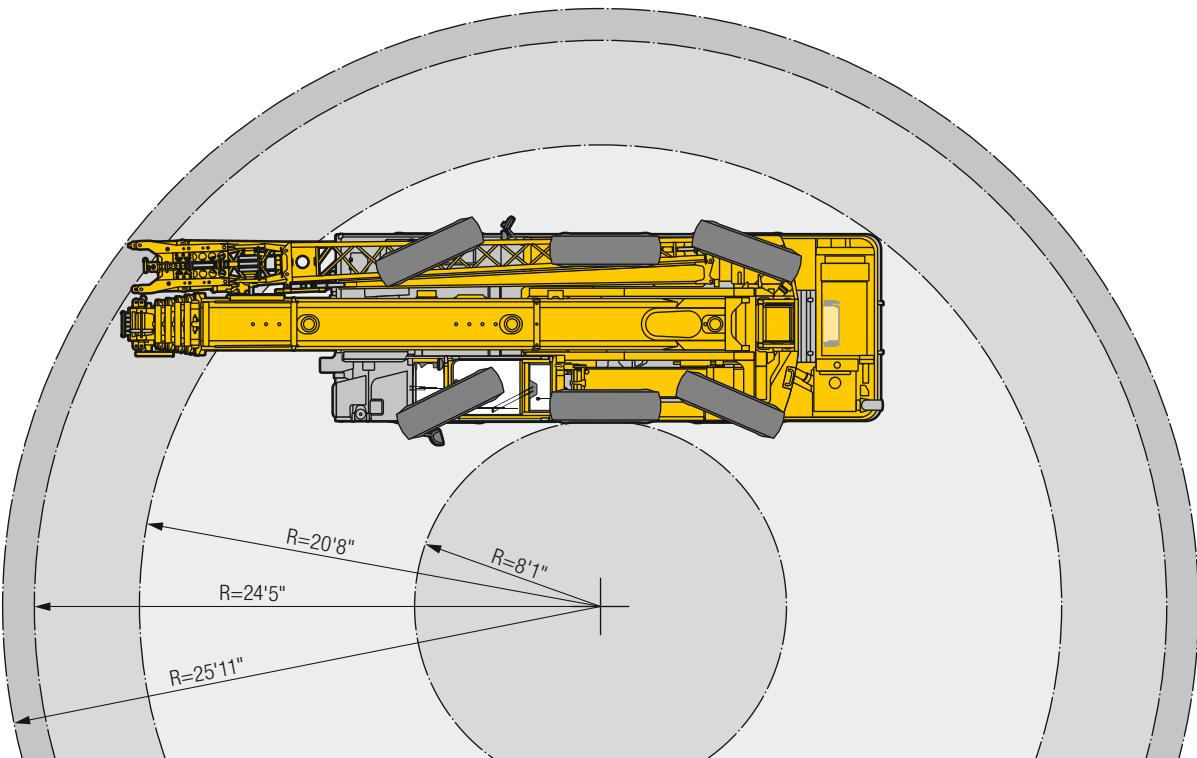

Spacious, compact and functional – city crane with lots of room

The LTC 1050-3.1 features extremely small dimensions. The front storage box can be removed to make it even smaller. A whole host of storage compartments can be used for accessories such as attachment equipment and support timbers.

Spacieuse, compacte, fonctionnelle – la grue à la fois citadine et spacieuse

La LTC 1050-3.1 se distingue par ses dimensions extrêmement compactes. Le démontage du coffre de rangement situé à l'avant permet de réduire encore plus l'encombrement de la machine. De nombreux rangements permettent d'avoir sous la main les accessoires, élingues, et autres bois de calage.

Compact design

Its turning circle radius over the telescopic boom with 385/95 R25 (14.00) tyres is just 24'7". In particularly constricted areas the boom can be luffed upwards to bring the turning circle of the chassis into play. The chassis length is 29'2" and can be reduced to 25'3" by removing the front storage box.

Structure compacte

Le rayon de braquage sur flèche télescopique avec pneumatiques 385 / 95 R25 (14.00) est de 24'7". Sur chantiers particulièrement exigus, la flèche peut être relevée de manière à adapter le rayon de braquage du châssis porteur. La longueur du châssis porteur est de 29'2" et peut être réduite à 25'3" en démontant le coffre de rangement avant.

Optimized dimensions

Dimensions optimisées

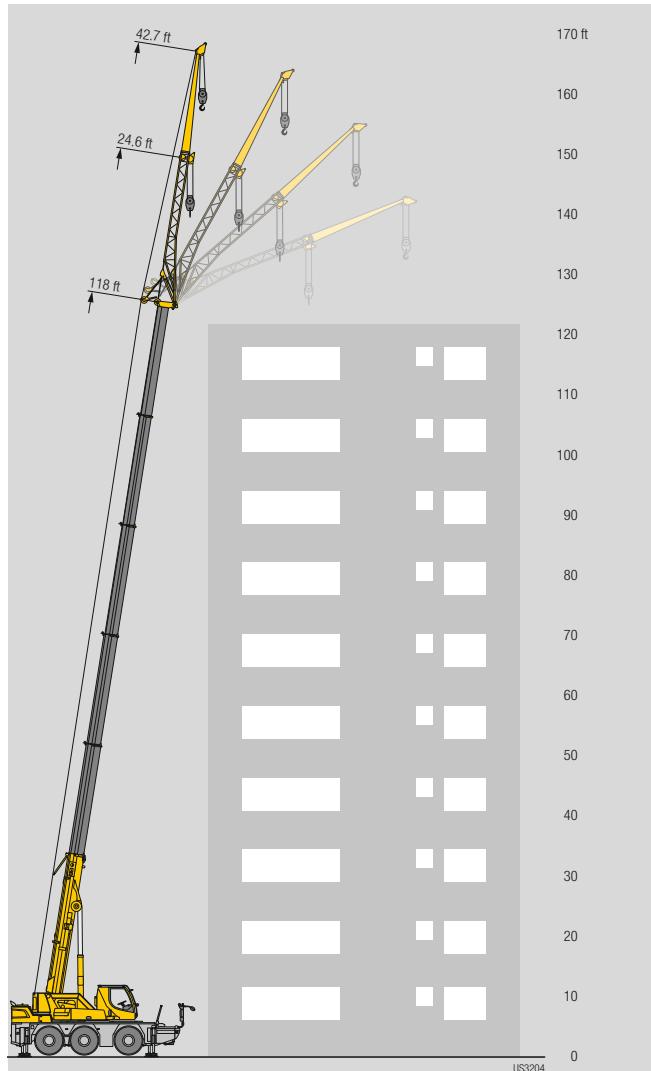

The LTC 1050-3.1 carries all the equipment it needs on the crane. With an axle load of 26,455 lbs it can drive with the basic ballast of 14,330 lbs and the folding jib. The spacious storage compartments provide space for additional equipment.

La LTC 1050-3.1 se déplace avec l'intégralité de son équipement. Avec un contrepoids total de 26,455 lbs et sa fléchette pliante, la grue respecte la charge de 14,330 lbs par essieu. Les coffres de rangement spacieux offrent suffisamment de place pour des équipements additionnels.

Assembly work in very constricted areas

The 24.6 ft to 42.7 ft double folding jib includes a 5 ft assembly jib. The assembly jib makes the LTC 1050-3.1 ideal for assembly work in very constricted areas and in low industrial buildings.

Travaux de montage sur chantiers exigu

La fléchette pliante double de 24.6 ft à 42.7 ft de longueur intègre une fléchette de montage de 5 ft. Equipée de la fléchette de montage, la LTC 1050-3.1 s'avère idéale pour les opérations de montage en espaces confinés et dans les halls de faible hauteur.

Equipment

Equipement

Crane carrier

Frame	Self-manufactured, torsion-resistant box-type design of high-tensile grain refined structural steel.
Outriggers	4-point supporting system, hydraulically telescopic into horizontal and vertical direction. Operation with remote control, automatic support leveling, electronic inclination display.
Engine	Diesel, 6 cylinder, watercooled, make Mercedes-Benz, output 260 kW (354 h.p.), max. torque 1033 lbs-ft. Exhaust emissions acc. to 97/68/EG and EPA/CARB. Fuel tank capacity: 79 gallons.
Transmission	ZF powershift gearbox with torque converter, lock-up clutch and integrated distribution gearbox with longitudinal differential.
Axles	All axles steered, axles 1 and 3 driven with transverse differential locks.
Suspension	All axles on hydro-pneumatic suspension and lockable hydraulically.
Tyres	6-fold, tyre size: 385/95 R 25 (14.00 R 25)
Steering	2-circuit system with hydraulic servo steering. Active speed depending rear axle steering, special steering programs for various driving situations.
Brakes	Service brake: all-wheel servo-air brake, all axles are equipped with disc brakes, dual circuit. Hand brake: spring-loaded, acting on all wheels of axles 2 and 3. Sustained-action brake: engine brake.
Electrical system	Modern data bus technique, 24 Volt DC, 2 batteries of 170 Ah each.
Toolbox	Detachable storage box at the front of chassis.

Crane superstructure

Frame	Self-manufactured, torsion-resistant welded design of high-tensile grain refined structural steel. The superstructure is connected with the carrier by a single-row ball bearing slewing ring which enables continuous rotation.
Crane drive	Diesel-hydraulic with 1 variable axial piston pump in open circuit, 1 gear type twin pump driven by the diesel engine of the carrier, 4 working movements simultaneously drivable.
Control	By selfcentering four directional joysticks in the crane cabin and by varying the speed of the diesel engine, electronic precontrol and stepless regulation of all crane movements.
Hoist gear	Axial piston constant motor, rope winch with installed planetary gear and spring loaded, hydraulically releasing holding brake.
Luffing gear	1 differential double ram with safety check valves and hydraulic compensation circuit.
Slewing gear	Axial piston fixed displacement motor, Liebherr planetary gear, spring loaded hydraulically releasing holding brake.
Driver's and crane operator's cab	Spacious corrosion resistant with comfort furnishings, rubber-elastically supported, with safety glazing, Operating and control elements for displacement and crane operation, comfortably equipped, air-conditioning system. For improved visibility cab slideable by telescopic arm and automatically lockable with chassis, cabin tiltable 20° to rear.
Safety devices	LICCON2 safe load indicator, hoist limit switch, safety valves against pipe and hose rupture.

The pictures contain also accessories and special equipment not included in the standard scope of delivery.

Telescopic boom	Buckling and torsion resistant design of high-tensile grain refined structural steel with oviform profile, 1 base section and 5 boom sections. All boom sections hydraulically extendable separately by the rapid-cycle telescoping system Telematik. Boom length: 27 ft – 118 ft.
Counterweight	14,330 lbs basic counterweight firmly mounted.
Electrical system	Control of the electric and electronic components by the latest data bus technology.

Operating modes

K	Single folding jib, 24.6 ft Double swing-away jib 24.6 ft – 42.7 ft Adjustment 0°, 20°, 40°, 60°
HK	Erection jib 5 ft long and incorporated into the swing-away jib. Adjustment 0°, 20°, 40°, 60°

Additional equipment

Pulley set / hook for erection jib	3 rope pulleys for a max. load capacity of 55,115 lbs. Single hook for max. 55,115 lbs load capacity.
Driver's and crane operator's cab	Lifting of the cab by the telescopic arm.
2nd hoist gear	For 2-hook operation or at operation with swing-away jib, if the main hoist rope shall remain reeved.
Tyres	6 tyres. Tyre size: 445/95 R 25 (16.00 R 25).
Drive 6 x 6	Additionally the second axle can be activated in off road operation.
Additional brake	Telma Eddy current brake at the 2 nd axle.

Other items of equipment available on request.

Equipment

Equipement

Châssis porteur

Cadre	Structure en caisson résistante à la torsion, fabriquée par Liebherr, en acier à grain fin très résistant.	Cabine conducteur / du grutier	Spacieuse cabine, traitement anticorrosion, équipement «grand confort», montée sur silentbloc en caoutchouc et dotée de vitres de sécurité, instruments de commande et de contrôle pour la translation et l'utilisation de la grue, équipement de confort, climatisation. Cabine mobile sur le bras télescopique offrant une visibilité optimale et verrouillable automatiquement avec le châssis porteur, cabine inclinable de 20° vers l'arrière.
Calage	Dispositif de calage horizontal et vertical en 4 points, entièrement déployable hydrauliquement. Utilisation avec commande à distance, mise à niveau automatique du calage, inclinomètre électronique.	Dispositif de sécurité	Contrôleur de charge LICCON2, fin de course crochet haut, clapets de sécurité en cas de ruptures de flexibles.
Moteur	Diesel, 6 cylindres, marque Mercedes-Benz, refroidissement par eau, puissance 260 kW (354 ch), couple maxi. 1033 lbs-ft. Emissions des gaz d'échappement conformes aux directives 97/68/EG et EPA/CARB. Capacité du réservoir carburant: 79 gallons.	Flèche télescopique	Structure résistant au voilage et à la torsion en acier à grains fins très résistant avec profil de flèche ovale, 1 élément de base et 5 éléments télescopiques. Tous les éléments télescopiques peuvent être sortis individuellement et hydrauliquement grâce au système de télescopage rapide TelematiK. Longueur de la flèche : 27 ft à 118 ft.
Boîte de vitesse	Boîte de vitesse ZF avec convertisseur de couple, embrayage lock-up et boîte de transfert intégrée avec différentiel longitudinal.	Contrepoids	Contrepoids de base fixe de 14,330 lbs.
Essieux	Tous les essieux sont directeurs, les essieux 1 et 3 sont entraînés avec blocages des différentiels transversaux.	Installation électrique	Technologie de bus de données à la pointe de la technologie pour la commande des composants électriques et électroniques.
Suspension	Tous les essieux sont suspendus hydro-pneumatiquement et peuvent être bloqués hydrauliquement.		
Pneumatiques	6 fois, dimension de pneumatiques : 385/95 R 25 (14.00 R 25)		
Direction	2 circuits avec direction assistée hydraulique. Direction active des essieux arrière et dépendante de la vitesse, programmes de direction spéciaux pour les différents modes de déplacement.		
Freins	Freins de service : servofrein à air comprimé, tous les essieux sont munis de freins à disque, à 2 circuits. Frein à main : par cylindres à ressorts, agissant sur les roues des essieux 2 et 3. Frein à régime continu: frein moteur.		
Installation électrique	Technique moderne de transmission de données par BUS de données, courant continu 24 Volts, 2 batteries de 170 Ah chacune.		
Caisse à outils	Coffre de rangement amovible sur la partie avant du véhicule.		

Partie tournante

Cadre	Structure soudée de fabrication Liebherr, résistante à la torsion, en acier à grains fins très résistant. Une couronne d'orientation à une rangée de billes sert de lien avec le châssis porteur et permet une rotation illimitée.
Entraînement	Diesel-hydraulique avec 1 pompe à débit variable et pistons axiaux dans un circuit hydraulique ouvert, 1 double pompe à engrenages entraînée par le moteur Diesel dans le châssis porteur, 4 mouvements de travail pouvant être exécutés simultanément.
Commande	Commande dans la cabine du grutier via 4 manipulateurs à retour automatique en position neutre et régulation du régime du moteur diesel, servocommande électronique et régulation continue de tous les mouvements de la grue.
Treuil de levage	Moteur à débit constant et pistons axiaux, treuils avec réducteur planétaire intégré et le frein d'arrêt à ressort à desserrage hydraulique.
Mécanisme de levage	1 vérins différentiels double avec clapet de sécurité anti-retour et conduite de compensation hydraulique.
Mécanisme de relevage	Moteur à cylindrée constante et à pistons axiaux, réducteur planétaire Liebherr, frein d'arrêt à ressort à desserrage hydraulique.

Modes de fonctionnement

K	Fléchette pliante simple, longueur 24.6 ft Double fléchette pliante 24.6 ft – 42.7 ft Positionnement à 0°, 20°, 40°, 60°
HK	Fléchette de montage 5 ft, intégrée à la fléchette pliante. Positionnement à 0°, 20°, 40°, 60°

Equipement supplémentaire

Jeu de poulie/crochet pour la fléchette de montage	3 poulies de câble pour une capacité de charge de 55,115 lbs max. Crochet simple pour une capacité de charge de 55,115 lbs max.
Cabine conducteur / du grutier	Levage de la cabine au-dessus du bras télescopique.
2ème mécanisme de levage	Pour le fonctionnement en mode 2 crochets ou lors du fonctionnement avec la fléchette pliante, quand le câble de levage principal doit rester moufler.
Pneumatiques	6 pneumatiques. Dimension des pneumatiques : 445/95 R 25 (16.00 R 25).
Entraînement 6 x 6	L'essieu 2 peut également être activé sur le terrain.
Frein complémentaire	Frein de Telma au niveau du 1er essieu.

Autres équipements supplémentaires sur demande.

Les figures contiennent également des accessoires et des équipements spéciaux non inclus de série dans la livraison.

Description of symbols

Explication des symboles

General symbols/Symboles généraux

	Outriggers Calage		Max. lifting capacity Capacité max.
	Outriggers – free on tyres Calage – libre sur pneus		Transmission Boîte de vitesses
	Axle Essieu		Gear Vitesse
	Radius Portée		Hookblock / Capacity Moufle à crochet / Capacité de charge
	Boom length Longueur de la flèche		Hoist gear Treuil de levage
	Boom position Position de la flèche		Crane carrier Châssis porteur
	Counterweight Contrepoids		Crane superstructure Partie tournante de la grue
	Tires Pneumatiques		Standard Norme
	Slewing gear / Working area Mécanisme d'orientation / Plage de travail		Gradability Aptitude à gravir les pentes
	Driving speed Vitesse de translation		

Crane specific symbols/Symboles spécifiques à la grue

	Telescopic boom Flèche télescopique		Road steering Direction sur route
	Swing away jib Fléchette pliante		All-wheel steering Direction toutes roues
	Integrated assembly jib Fléchette de montage intégrée		

Remarks

1. The lifting capacities do not exceed 85 % of the tipping load according to ASME B 30.5. The crane's structural steelwork is in accordance with EN 13000 and ASME B 30.5.
2. For the calculation of the load charts at least a wind speed of 9 m/s (33 km/h) and regarding the load a sail area of 1 m² per ton load and a wind resistance coefficient of 1.2 on the load have been taken into account. For lifting of loads with large sail areas and/or high wind resistance coefficients the maximum wind speed as stated in the load charts has to be reduced.
3. Lifting capacities are given in kips.
4. The weight of the hook blocks and hooks is part of the load and therefore it must be deducted from the lifting capacities.
5. Working radii are measured from the slewing centre.
6. The lifting capacities given for the telescopic boom apply if the folding jib is removed.
7. Subject to modification of lifting capacities.
8. Lifting capacities above 93,300 lbs only with additional pulley block.
9. The drive and crane cabin is retracted and locked!
10. The data of this brochure serves only for general information. All information is provided without warranty. Instructions for the correct commissioning of the crane please take from the operation manual and the load chart book.

Remarques

1. La capacité de charge ne doit pas dépasser 85 % de la charge de basculement conformément à ASME B 30.5. La structure métallique de la grue est conforme à EN 13000 et ASME B 30.5.
2. Une vitesse de vent de 9 m/s (33 km/h) minimum, une surface de prise au vent de 1 m² par tonne ainsi qu'un coefficient de résistance au vent de la charge 1,2 sont pris en compte pour le calcul des tableaux de charge. Lorsque des charges ayant une surface de prise au vent et/ou un coefficient de résistance au vent plus élevé(e)s sont levées, la vitesse de vent maximale indiquée dans les tableaux de charge doit être réduite.
3. Les charges sont indiquées en kips.
4. Le poids du crochet de levage resp. de la moufle à crochet est une partie de la charge et doit donc être déduit de la capacité de charge.
5. Les portées sont calculées à partir de l'axe de rotation.
6. Les charges indiquées pour la flèche télescopique sont valables lorsque la fléchette pliante est démontée.
7. Charges données sous réserve de modification.
8. Forces de levage plus de 93,300 lbs seulement avec moufle additionnel.
9. La cabine de conduite et du grutier est rétractée et verrouillée!
10. Les données de cette brochure sont données à titre informatif. Ces renseignements sont sans garantie. Les consignes relatives à la bonne mise en service de la grue sont disponibles dans le manuel d'utilisation et le manuel de tableaux de charge.
